Ci/cd | Git | Kubernetes | Linux

Experience

Backend Developer - Tech Solutions Inc.

New York, NY | 01-2020 - 06-2023

- Designed and implemented a scalable software development environment (SDE) across multiple platforms, including Kubernetes and virtual machines, ensuring optimal performance and security
- Integrated key SDE components like GitLab, GitLab Runner, and Sonatype Nexus/IQ into existing infrastructures to streamline development processes and enhance collaboration
- Managed the operation, maintenance, and updates of the SDE, ensuring seamless functionality and quick error recovery for uninterrupted development workflows
- Established and maintained virtual test servers and Kubernetes clusters for development teams, enabling efficient testing and deployment processes
- Administered user accounts, facilitated onboarding/offboarding processes, and addressed user requests promptly, contributing to a smooth software development environment

Backend Developer - Tech Solutions Inc.

New York, NY | 01-2020 - 06-2023

- Developed REST APIs in Rust
- Improved database performance by 30%
- Mentored junior developers

Education

University of Example

Boston, MA | 09-2015 - 06-2019
